

1999 – 2008

Highlights

All components of the migration numbers used in this report are based on the Yukon Health Care Insurance Plan registration file. A new methodology has been implemented as of 2008; therefore historical data contained within this publication may differ slightly when compared to previously published data.

This report examines migration patterns in the Yukon and is divided into three sections. The first section looks at immigration and emigration for the Yukon from 1999 to 2008. It examines both yearly and quarterly migration patterns by gender and age. The second section looks at the median length of residency in the Yukon for out-migrants (those who have moved out of the Yukon during the year and not returned) and non-migrants (those who remained resident in the Yukon during the year) by gender, age and ethnicity. The third section compares continuous length of residency in the Yukon in 2008 with 2003, also by gender, age and ethnicity.

Immigration and Emigration, Yukon, 1999 to 2008

In total, from 1999 to 2008, more people have moved into the Yukon than have moved out, with gains exceeding losses for six consecutive years (2003 to 2008). Subsequently, emigration exceeded immigration from 1999 through 2002. In 2008, 3,517 people immigrated to the Yukon, while 2,550 people emigrated from the Yukon.

Net Migration, Yukon, 1999 to 2008

Net migration is the difference between the number of people entering the Yukon (immigration) and the number of people leaving the Yukon (emigration). From 1999 to 2008, average annual net migration for the Yukon was 41. The largest increase in the Yukon population occurred in 2008 when net migration equalled 967, and the largest decrease was in 1999 when net migration was -880.

Yearly Turnover

From 1999 to 2008, the average annual turnover (immigration plus emigration) for the Yukon was 6,551. Turnover shows the segment of the population that is mobile and affects things such as the housing market, rental prices and vacancy rates.

Since 1999, more men than women moved into or out of the Yukon, indicating that men are more mobile than women. From 1999 to 2008, the average annual turnover was 3,877 for men and 2,674 for women.

People in younger age groups are also more mobile. Average annual turnover from 1999 to 2008 shows that fewer people in age groups 55–64-year-old and 65+ were moving into or out of the Yukon. The age group with the highest average annual turnover was the 25–34-year-old age group (1,572).

Migration by Sex

Net Migration by Sex, Yukon, 1999 to 2008

The pattern of net migration is similar for males and females, although males are more mobile, exceeding females in migration in each year except 2001 and 2006. From 1999 to 2008, average annual net migration was 27 for males and 14 for females. In 2008, net migration for both males and females was positive, following a trend that started in 2003.

Quarterly Net Migration, Males, Yukon, 1999 to 2008

Quarterly net migration for males ranged from a low of -327 in the first quarter of 1999 to a high of 223 in the first quarter of 2008. Quarterly net migration for females ranged from a low of -203 in the first quarter of 1999 to a high of 145 in the fourth quarter of 2007. From 1999 to 2008, average quarterly net migration was 7 for males and 3 for females.

Quarterly Net Migration, Females, Yukon, 1999 to 2008

Migration by Age

Net Migration by Age, Yukon, 1999 to 2008

Net migration by age group shows that between 1999 and 2008, the 25–34-year-old age group increased by 698. The age group with the largest decrease in terms of net migration for the same time period was the 15–24-year-old age group (-374).

Net Migration by Age and Sex, Yukon, 1999 to 2008

In terms of net migration between 1999 and 2008, the pattern of net migration by age shows that the Yukon lost more males than females in the youngest age groups, gained more males than females for the age groups between 25 and 54, and lost more females than males in the older age groups.

Net Migration by Age and Sex, Yukon, 2008

In 2008, net migration by age was positive for both sexes in all age groups with the exception of females in the 0–14-year-old age group. The age group with the largest positive net migration was the 25–34-year-old category, consisting of 207 males and 91 females.

Migration by Quarter

Immigration and Emigration by Quarter, Yukon, 1999 to 2008

From 1999 to 2008, average quarterly immigration for the Yukon was 824 and average quarterly emigration was 814. In all four quarters of 2008, more people moved into the Yukon than out of it.

Net Migration by Quarter, Yukon, 1999 to 2008

From 1999 to 2008, net migration in the Yukon has been positive in 21 quarters and negative in 19 quarters. Net migration reached a high of 360 in the fourth quarter of 2007, and a low of -530 in the first quarter of 1999. Average quarterly net migration for this period was 10.

Turnover (Immigration plus Emigration) by Quarter, Yukon, 1999 to 2008

From 1999 to 2008, the average quarterly turnover was 1,638. Turnover reached a high of 2,588 in the fourth quarter of 2007 and a low of 898 in the second quarter of 2008.

Median Length of Residency cont.

Median Length of Residency (Years), by Age, Yukon, 2006 to 2008

* Refers to median length of residency as 15 or more years. Data after fifteen years is limited by the Yukon Health Care Insurance Plan registration file.

In general, people in younger age groups are more mobile than those in older age groups. Data from 2006 to 2008 shows the median length of residency for those who moved out the Yukon, in the 45-to-54-year-old and the 55-to-64-year-old age groups, has noticeably decreased while all other age groups of out-migrants have stayed relatively steady.

In each age group, out-migrants are more mobile than non-migrants. In 2008, the median length of residency for those Yukoners aged 65 and over was 12 years for out-migrants and 15 or more years for non-migrants.

Median Length of Residency (Years), by Ethnicity, Yukon, 2006 to 2008

In 2008, the median length of residency for First Nations out-migrants and non-First Nations out-migrants showed that First Nations were as mobile as non-First Nations. The median length of residency for First Nations out-migrants and non-First Nations out-migrants was three years.

In 2008, the median length of residency for both First Nations non-migrants and non-First Nations non-migrants was seven years.

Length of Continuous Residency

Length of Continuous Residency (Years), by Ethnicity and Sex, Yukon, 2003

The 15 years or more group increased by 1,751 people, or 27.0%, when comparing 2003 to 2008. The only decrease was in the 10-to-14-year residency group, which decreased by 816 people, or 16.6%. Comparing 2003 to 2008, there was a 1.1% increase in the number of people whose continuous length of residency was less than one year, indicating that more people are immigrating to the Yukon.

Length of Continuous Residency (Years), by Ethnicity and Sex, Yukon, 2008

In 2008, there was no significant difference between the percentage of status First Nations (22.9%) in residency group '15 or more years' when compared with non-First Nations residents (24.5%). There is a larger percentage of females (27.1%) in residency group '15 or more years' when compared with male residents (21.4%). This indicates that females are somewhat less mobile than males.

Median Length of Residency cont.

Median Length of Residency (Years), by Age, Yukon, 2006 to 2008

* Refers to median length of residency as 15 or more years. Data after fifteen years is limited by the Yukon Health Care Insurance Plan registration file.

In general, people in younger age groups are more mobile than those in older age groups. Data from 2006 to 2008 shows the median length of residency for those who moved out the Yukon, in the 45-to-54-year-old and the 55-to-64-year-old age groups, has noticeably decreased while all other age groups of out-migrants have stayed relatively steady.

In each age group, out-migrants are more mobile than non-migrants. In 2008, the median length of residency for those Yukoners aged 65 and over was 12 years for out-migrants and 15 or more years for non-migrants.

Median Length of Residency (Years), by Ethnicity, Yukon, 2006 to 2008

In 2008, the median length of residency for First Nations out-migrants and non-First Nations out-migrants showed that First Nations were as mobile as non-First Nations. The median length of residency for First Nations out-migrants and non-First Nations out-migrants was three years.

In 2008, the median length of residency for both First Nations non-migrants and non-First Nations non-migrants was seven years.

Length of Continuous Residency

Length of Continuous Residency (Years), by Ethnicity and Sex, Yukon, 2003

The 15 years or more group increased by 1,751 people, or 27.0%, when comparing 2003 to 2008. The only decrease was in the 10-to-14-year residency group, which decreased by 816 people, or 16.6%. Comparing 2003 to 2008, there was a 1.1% increase in the number of people whose continuous length of residency was less than one year, indicating that more people are immigrating to the Yukon.

Length of Continuous Residency (Years), by Ethnicity and Sex, Yukon, 2008

In 2008, there was no significant difference between the percentage of status First Nations (22.9%) in residency group '15 or more years' when compared with non-First Nations residents (24.5%). There is a larger percentage of females (27.1%) in residency group '15 or more years' when compared with male residents (21.4%). This indicates that females are somewhat less mobile than males.

Length of Continuous Residency

Length of Continuous Residency (Years), by Ethnicity and Age, Yukon, 2003

The length of continuous residency for status First Nations and non-First Nations generally increases with age. People in younger age groups are more mobile than people in older age groups. In 2008, 55.6% of all residents 65 and older were continuous residents in the Yukon for 15 years or more.

The most mobile age group in 2008 in the Yukon was the 25-to-34-year-old age group. This group had the lowest percentage (1.9%) of people who have lived in the Yukon continuously for 15 or more years. The 25-to-34-year-old age group also had a high percentage of people who lived in the Yukon for less than one year (21.6%). Status First Nations were less mobile than non-First Nations in all age groups except for the 65+ age group.

Comparing 2003 to 2008, the percentage of people who have lived in the Yukon continuously for 15 or more years increased in each age group except the 35-to-44-year-old, 45-to-54-year-old and 65+ age groups.

Length of Continuous Residency (Years), by Ethnicity and Age, Yukon, 2008

Notes: '15' refers to median length of residency as **fifteen or more** years. Data after fifteen years are limited by the Yukon Health Care registration file.

These data were obtained by comparing the sets, in successive years, of Yukon Health Care Insurance Plan recipients identified as current Yukon residents on January 1. Anyone who is identified as a Yukon resident on January 1, two years in a row, is considered a non-migrant. This includes some who may have moved out of the Yukon and moved back during the same year. Those who were in the Yukon on January 1 of one year, but not on the following January 1 are out-migrants, and those who were not in the Yukon on January 1 of one year, but were the following January 1 are in-migrants. The length of residency will be the number of successive years that an individual who is currently a resident of the Yukon is a non-migrant.

'Median length of residency' refers to the value at which one half of the lengths of residency is higher and one half is lower. A median is preferred to an average in this case, since in order to calculate an average, we would be required to know the lengths of residency associated with all Yukon residents. This is not possible, since complete electronic health records only begin in the mid-1980's.
